## TEST REPORT

**Client**..... : RISE OPTOELECTRONICS CO.,LTD.  
**Address**..... : 4F, Building 4A, Kelunte Ind. Park, Ganli 6th Rd., Buji, 518112  
Shenzhen, China  
**Brand Name**..... :   
**Manufacturer**..... : RISE OPTOELECTRONICS CO.,LTD.  
**Address**..... : 4F, Building 4A, Kelunte Ind. Park, Ganli 6th Rd., Buji, 518112  
Shenzhen, China  
**Testing Laboratory**.... : Shenzhen Southern LCS Compliance Testing Laboratory Ltd.  
**Address**..... : B Area, 1-2F, Building B, Zhongyu Green High-tech Industrial  
Park, Wenge Road, Heshuikou, Gongming Street, Guangming  
New District, Shenzhen, China  
**Product Description**.. : LED Inground Light  
**Models**..... : 88265, 88202, 88204, 88228, 88229, 88230, 88422, 88423, 88424,  
88425, 88426, 88427, 88428, 88429, 88431, 88432, 88325, 88326,  
88256, 88267, 88261, 88262, 88263, 88264  
**Test Model** : 88265  
**Rating**..... : See Model List On Page 2  
**Method**..... : IEC 60598-1: 2014  
**Test Item**..... : IP67  
**Date of Test**..... : 2018-09-06~2018-09-26  
**Date of Issue**..... : 2018-09-26  
**Test Result**..... : Pass

Report No.: LCS180906046BS

**General product information:**

- Unless otherwise specified, the model 88265 was chosen as representative model to perform all test.

**Model list:**

Model No.	Rating
88265	DC24V, 36W, IP67
88202	DC12V, 3W, IP67
88204	DC12V, 1W, IP67
88228	DC12V, 3W, IP67
88229	DC12V, 6W, IP67
88230	DC24V, 9W, IP67
88422	DC12V, 3W, IP67
88423	DC12V, 6W, IP67
88424	DC24V, 9W, IP67
88425	DC24V, 12W, IP67
88426	DC12V, 3W, IP67
88427	DC12V, 6W, IP67
88428	DC24V, 9W, IP67
88429	DC24V, 12W, IP67
88431	DC12V, 12W, IP67
88432	DC12V, 6W, IP67
88325	DC24V, 6W, IP67
88326	DC24V, 36W, IP67
88256	DC12V, 1W, IP67
88267	DC12V, 1W, IP67
88261	DC12V, 3W, IP67
88262	DC12V, 6W, IP67
88263	DC24V, 12W, IP67
88264	DC24V, 24W, IP67

Report No.: LCS180906046BS

**Equipment used during test:**

ID Number	Instrument	Model/ Type	Calibration Date
SLCS-S-031	Sand and dust test box	SG-500	2018-01-26
SLCS-S-040	Submersible test unit	X8	2018-04-26
SLCS-S-135	Digital hygrometer thermometer	HTC-1	2017-10-09
SLCS-S-072	Torque Driver	26RTD	2018-08-10

**Test Item:**

Tests for protection against dust-proof: IP6X

**Test Method:**

The tests should be carried out under the standard atmospheric condition.

Temperature range: 20°C to 30°C

Dust-proof luminaires (first characteristic IP numeral 5) shall be tested in a dust chamber similar to that shown in Figure 6, in which talcum powder is maintained in suspension by an air current. The chamber shall contain 2 kg of powder for every cubic metre of its volume. The talcum powder used shall be able to pass through a square-meshed sieve whose nominal wire diameter is 50 µm and whose nominal free distance between wires is 75 µm. It shall not have been used for more than 20 tests.

The test shall proceed as follows.

- a) The luminaire is suspended outside the dust chamber and operated at rated supply voltage until operating temperature is achieved.
- b) The luminaire, whilst still operating, is placed with the minimum disturbance in the dust chamber.
- c) The door of the dust chamber is closed.
- d) The fan/blower causing the talcum powder to be in suspension is switched on.
- e) After 1 min, the luminaire is switched off and allowed to cool for 3 h whilst the talcum powder remains in suspension.

NOTE: The 1 min interval between switching on the fan/blower and switching off the luminaire is to ensure that the talcum powder is properly in suspension around the luminaire during initial cooling, which is most important with smaller luminaires. The luminaire is operated initially as in item a) to ensure the test chamber is not overheated.

**Acceptance Conditions:**

After completion of the tests, the luminaire shall withstand the electric strength test specified in Section 10, and inspection shall show:

No deposit of talcum powder inside enclosures for dust-tight luminaires

**Test Result:**

Pass       Fail

IEC 280/01

NOTE See IEC 60068-2-68, figure 2 valid for La2 only.

Figure 2 – Test device to verify protection against dust (dust chamber)

**Test Item:**

Tests for protection against ingress moisture: IPX7

**Test Method:**

The tests should be carried out under the standard atmospheric condition.

Temperature range: 20°C to 30°C

Watertight luminaires (second characteristic IP numeral 7) are switched off and immediately immersed for 30 min in water, so that there is at least 150 mm of water above the top of the luminaire and the lowest portion is subjected to at least 1 m head of water. Luminaires shall be held in position by their normal fixing means. Luminaires for tubular fluorescent lamps shall be positioned horizontally, with the diffuser upwards, 1 m below the water surface.

NOTE: This treatment is not sufficiently severe for luminaires intended for operation under water. Before the tests for the second characteristic numeral, with the exception of IPX8, the luminaire complete with lamp(s) shall be switched on and brought to a stable operating temperature at rated voltage.

The water for the tests shall be at a temperature of 15 °C ± 10 °C

Luminaires shall be mounted and wired as in normal use and placed in the most unfavourable position, complete with their protective translucent covers, if any, for the tests of IP.

Where connection is made by a plug or a similar device, then this shall be regarded as part of the complete luminaire and shall be included in the tests and similarly for any separate controlgear.

For tests of IP, fixed luminaire intended for mounting with its body in contact with a surface shall be tested with an expanded metal spacer interposed between the luminaire and the mounting surface. The spacer shall be at least equal in overall size to the projection of the luminaire, and have dimensions as follows:

Longway of mesh	10 mm to 20 mm
Shortway of mesh	4 mm to 7 mm
Strand width	1,5 mm to 2 mm
Strand thickness	0,3 mm to 0,5 mm
Overall thickness	1,8 mm to 3 mm

Luminaires having provision for draining water by means of drain holes shall be mounted with the lowest drain hole open unless otherwise specified in the manufacturer's installation instructions.

If the installation instructions indicate that a luminaire is for ceiling or under-canopy mounting, the luminaire shall be attached to the underside of a flat board or plate which extends 10 mm beyond that part of the luminaire perimeter in contact with the mounting surface

For recessed luminaires, the parts in the recess and the parts protruding from the recess shall each be tested according to their IP classification as indicated in the manufacturer's mounting instructions. A box encapsulating the part in the recess may be necessary for the test of IP.

Report No.: LCS180906046BS

Note: Portable luminaires, wired as in normal use, shall be placed in the most unfavourable position of normal use.

Glands, if any, shall be tightened with a torque equal to two-thirds of that applied to glands in the test of 4.12.5.

Fixing screws of covers, other than hand-operated fixing screws of glass covers, shall be tightened with a torque equal to two-thirds of that specified in Table 4.1.

Screwed lids shall be tightened with a torque having a value in newton metres numerically equal to one-tenth of the nominal diameter of the screw thread in millimetres. Screws fixing other caps shall be tightened with a torque equal to two-thirds of that specified in Table 4.1.

**Acceptance Conditions:**

After completion of the tests, the luminaire shall withstand the electric strength test specified in Section 10, and inspection shall show:

No trace of water on electrical connections, current carrying parts or on insulation where it could become a hazard for the user or surroundings, for example where it could reduce the creepage distances below the values specified in Section 11; the only exception to this is for SELV conductors where the voltage under load does not exceed 12 V r.m.s. or 30 V ripple free d.c. and the conductors are protected from corrosion.

No trace of water having entered in any part of a watertight or pressure watertight luminaire

**Test Result:**

Pass       Fail

**Table 4.1 – Torque tests on screws**

Nominal outer thread diameter of screw mm	Torque Nm		
	1	2	3
Up to and including 2,8	0,20	0,40	0,40
Over 2,8 up to and including 3,0	0,25	0,50	0,50
Over 3,0 up to and including 3,2	0,30	0,60	0,50
Over 3,2 up to and including 3,6	0,40	0,80	0,60
Over 3,6 up to and including 4,1	0,70	1,20	0,60
Over 4,1 up to and including 4,7	0,80	1,80	0,90
Over 4,7 up to and including 5,3	0,80	2,00	1,00
Over 5,3 up to and including 6,0	–	2,50	1,25
Over 6,0 up to and including 8,0	–	8,00	4,00
Over 8,0 up to and including 10,0	–	17,00	8,50
Over 10,0 up to and including 12,0	–	29,00	14,50
Over 12,0 up to and including 14,0	–	48,00	24,00
Over 14,0 up to and including 16,0	–	114,00	57,00

**Table 4.2 – Torque tests on glands**

Diameter of test rod mm	Moment	
	Metal glands Nm	Moulded plastic glands Nm
Up to 7	6,25	2,5
Over 7 up to 14	6,25	3,25
Over 14 up to 20	7,50	5
Over 20	10	7,50

Withstand the electric strength after IP6X test:		
Test Location	Test Voltage	Broken or Flashover
Live parts and accessible parts	500V	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Withstand the electric strength after IPX7 test:		
Live parts and accessible parts	500V	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
